Såfremt sagen har påført erindring kan denne nulstilles ved at påføre dato for genoptagelse. Dermed forsvinder sagen fra erindringslisten. En afsluttet sag kan ikke genoptages - der må oprettes en ny sag der henviser til den afsluttede. Systemet vil automatisk sørge for henvisning til den nye sag.

Dette felt anvendes, hvis de enkelte afdelinger ikke skal kunne se hinandens sager.

I dette tilfælde gives hver afdeling hver sit nummer i dette felt. Flere afdelinger kan dog godt slås sammen med samme nummer.

Under "Installation Control" i SPEED II oprettes en sikkerhedsgruppe for hver afdeling. I denne sikkerhedsgruppe gives ret til egen afdelings security nummer - men ikke til de andre afdelingers security nummer.

Hver bruger tilknyttes sin afdelings sikkerhedsgruppe.

Der kan som supplement oprettes en sikkerhedsgruppe til brugere, som kan se alle afdelingers sager, ligesom den sikkerhedsansvarlige altid kan se alle afdelingers sager.
