• **V5 6909 WEIGHT VARIABLE**

Originally, the data material was card weighted, i.e. some 00001500 cases occurred more than once. The duplicate cases have been removed (on the basis of a comparison of the entire case after conversion to character format), and a number has been inserted in the 'original' case indicating the number of times it occurred in the card weighted data file.

- 67B. (If yes) - The deficit comes from setting the rent value, which is considered as income, very low, while the interest on the loans in the house are usually very high. It is now proposed that this advantage should be limited for owners of large houses in such a manner that the rent value, which, as said before, is considered as income, be raised - hereby decreasing the deficit.
