Sample type:

Sampling-procedure: A representative sample (simple random sample) was drawn from the Central Population Register (CPR) – which is a national register of all Danish citizens – from which respondent's name and address were identified. Thus, the sampled unit was 'named individuals'. No stratification, clustering etc. was employed.

Fieldwork institute:

Fieldwork methods:

Web based (self-completion). If non-response then telephone interviews were used.

For the 18 to 65 years old an introduction letter was posted including a link to a web-enquete and a personal code to activate the survey. A self-completion paper-based questionnaire can be sent if requested.

N. of respondents:

1473
